1

Custom Audiences are an extremely effective way for marketers to target their Facebook Ads.

Through Custom Audiences, you can target your Facebook Ads with a list of email addresses, website visitors, video viewers, mobile app users, and even page engagers!

The opportunities for precisely targeting potential customers are basically endless. You're no longer limited to hard-guessing your advertising targets by gender or vague interests. Instead, you can target a very precise niche of highly-targeted users.

Let's look at an example:

Say you have an email list of 10,000 customers who've bought your product. You want to promote the launch of an updated product version to these customers. By simply uploading your email list to Facebook, you'll create a new Custom Audience. Facebook will then try to match those email addresses with its users.

For the sake of our example, let's say Facebook was able to match 70% of your list. You can now target advertising for the new, improved version of your product to 7,000 customers who already loved the previous one – I bet the conversion rate will be pretty high!

This example is just the beginning. Since Custom Audiences launched in October 2013, Facebook has continually made significant updates, making it much more powerful and flexible than ever before.

Here are your options for custom audiences:

Standard Custom Audience

Upload a list of emails and up to 14 other identifiers (for example age, gender and ZIP code) that you want to target and Facebook will match them with its users. Facebook will usually match between 60-80% of the contacts on your list.

Website Custom Audiences

Website Custom Audiences mean you don't need to have target users' email addresses or phone

numbers. Instead, simply insert the Facebook Pixel tracking code on your website and you'll be able to target your Facebook Advertising for all users that have visited a specific page on your website during a set time period of up to 180 days.

App Activity Custom Audiences

You can create audiences based on what actions people take when they use your app. You can create audiences of people who recently opened your app, recently completed a purchase, completed large purchases, or achieved a certain level in your game or platform. For example, you can create an audience of those who have used your app previously, but not used it in the last 30 days.

Engagement Custom Audiences

You can create audiences of those who engage with certain ad types or your page. The duration of

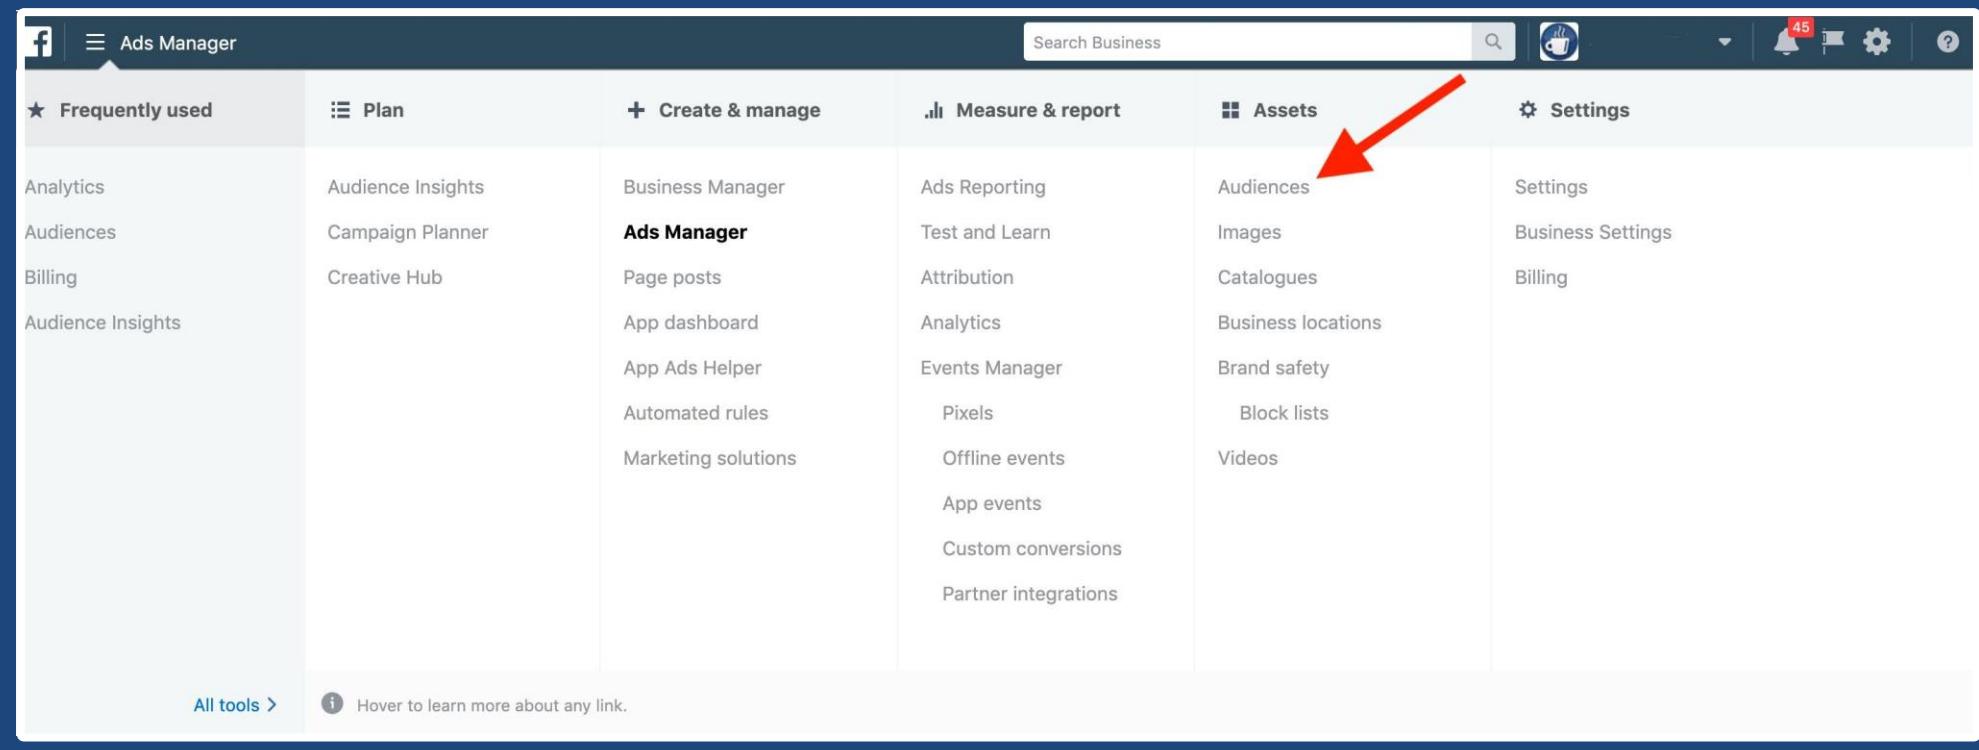

these ad types is up to 365 days (apart from lead forms which have a 90 day duration), although more recent is often better.

Lookalike Audiences

Once you've created a Custom Audience, you can ask Facebook to create a broader Lookalike Audience to target your ads towards similar users. Facebook will look for patterns and characteristics your users have in common – such as age, gender, or interests – and create a much bigger list of very similar users. With the ability to immediately expand your list and target users who are likely to convert, you can see why Lookalike Audiences are so powerful. Since launching, Facebook has expanded Lookalike Audiences, allowing you to create them based on your Facebook Page fans, website visitors, engagers and customer lists.

Getting Started with Custom Audiences

To create your first Custom Audience, click on the "Audience" option under the Assets section of the Ads Manager main menu.

The screenshot shows the Facebook Ads Manager interface. At the top, there's a navigation bar with icons for search, notifications (45), and settings. Below the navigation bar is a main menu with several sections: 'Frequently used' (Analytics, Audiences, Billing, Audience Insights), 'Plan' (Audience Insights, Campaign Planner, Creative Hub), '+ Create & manage' (Business Manager, Ads Manager, Page posts, App dashboard, App Ads Helper, Automated rules, Marketing solutions), 'Measure & report' (Ads Reporting, Test and Learn, Attribution, Analytics, Events Manager, Pixels, Offline events, App events, Custom conversions, Partner integrations), 'Assets' (Audiences, Images, Catalogues, Business locations, Brand safety, Block lists, Videos), and 'Settings' (Settings, Business Settings, Billing). A red arrow points to the 'Audiences' link under the 'Assets' section. At the bottom left, there's a 'All tools >' link and a help icon with the text 'Hover to learn more about any link.'

Use the blue Create Audience button to begin setting up a new audience.

The screenshot shows the AdEspresso Asset library interface. At the top, there's a navigation bar with the AdEspresso logo, a search bar labeled 'Search Business', and various icons for notifications, settings, and help. Below the navigation bar, the main area has tabs for 'Audiences', 'Images', 'Locations', and 'Videos'. The 'Audiences' tab is selected. On the left, there's a sidebar titled 'All audiences' with sections for 'Folders' and 'Recent audiences'. The main content area displays a table of existing audiences, each with a checkbox, name, type, size, availability, date created, and sharing options. A red arrow points to the 'Create Audience' button at the top left of the audience list.

	Name	Type	Size	Availability	Date Created	Sharing
<input type="checkbox"/>	Complete Registration (Pixel) 180 Days	Custom Audience Website	Below 1,000 Low website traffic ⓘ	Ready	24/04/2019 13:44	--
<input type="checkbox"/>	test test	Custom Audience Unknown	Below 1,000 Small after matching ⓘ	Ready	17/04/2019 10:49	--
<input type="checkbox"/>	Test carlo t. test	Custom Audience Unknown	Below 1,000 Small after matching ⓘ	Ready	17/04/2019 10:33	--
<input type="checkbox"/>	Giorgio test 3.2 - 2 Just a test	Custom Audience Customer List	Below 1,000 Small after matching ⓘ	Ready	09/04/2019 14:21	--
<input type="checkbox"/>	Giorgio test 3.2 just a test	Custom Audience Unknown	Below 1,000 Small after matching ⓘ	Ready	09/04/2019 09:41	--
<input type="checkbox"/>	Giorgio test 3.2 just a test	Custom Audience Unknown	Below 1,000 Small after matching ⓘ	Ready	09/04/2019 09:41	--

After selecting the Custom Audience option from the dropdown menu that appears, a popup window will open and ask you to pick which type of audience you'd like to create.

About Custom Audiences

Create the most relevant audiences by adding people from the sources that matter to you.

 This process is secure and the details about your

[Cancel](#)

Let's select the "Customer File" option. This is where you can upload your list of leads or customers.

You'll have two options to sync "customer lists":

- > Manually upload your audience in a .txt or .csv file
- > Sync your Email CRM to your Facebook Ads Account

Option #1) Manual Upload

You'll be presented with three options:

Create a Custom Audience

Customer file

- Use a file that includes customer lifetime value (LTV)
- Use a file that doesn't include LTV
- Import from MailChimp

Customer file best practices

We recommend using a .csv file that includes the customer lifetime value (LTV).

The first two options require a .csv or .txt file, and if you have an ecommerce store often you can export an extra column for the customer lifetime value data. The third option obviously requires a MailChimp account to sync with.

There are up to 15 identifiers you can include in the upload such as name, city and age along with the email address.

Create a data file Custom Audience

1 Prepare a file with your customer data

Identifiers you can use (15) [Show](#)

Email address Phone number Mobile advertiser ID First name Surname ZIP/Postcode City County/Region
Country Date of birth Year of birth Gender Age Facebook app user ID Facebook Page user ID

2 Add your file

Original data source [Select the origin of this upload](#)

Add a new file (CSV or TXT) [Download file template](#)
Drag and drop your file here or [Upload File](#)

Copy and paste

3 Name Your Audience

Name your audience 50 [X](#) [Show description](#)

[Cancel](#) [Back](#) [Next](#)

Upload the file and select an origin for the data source: either directly from customers, from partners such as agencies, or a mix.

Give your Custom Audience a short, easy-to-remember name that describes this specific audience. Some ideas include “Former customers,” “Email signups,” or something similar.

Add a description. You'll eventually want to use this field to insert notes every time you add a new audience. However, you don't have to worry about it at this point.

HOW TO MANUALLY UPLOAD WITH ADESPRESSO

HOW TO DATA SYNC WITH ADESPRESSO

You can do this with AdEspresso in **5 easy steps**.

Step 1: Choose your CRM or email marketing tool as your source.

1 SOURCE CHOICE

Lead Generation
Sync Lead Generation Ads To Your CRM

facebook.

Custom Audience
Sync Your CRM to Create New Audiences

ActiveCampaign >	AWeber	GetResponse	Google Sheets
HubSpot	Infusionsoft.	INTERCOM	MailChimp
Marketo	salesforce		

Step 2: You select which email list you'll pull the contact information from.

The screenshot shows the Zapier interface during the 'Source Config' step for a HubSpot integration. At the top, a navigation bar displays six steps: 1. Source (light blue), 2. Source Config (dark blue), 3. Target (gray), 4. Target Config (gray), 5. Mapping (gray), and 6. Recap (gray). The main area is titled 'SOURCE CONFIGURATION' with a large '2' icon. To the right is the 'HubSpot' logo. Below the title, the text 'Hubspot List' is displayed, followed by a dropdown menu containing the option 'Getting Started Webinar (114)'. At the bottom left is a 'Back' button with a left arrow icon, and at the bottom right is a green 'Save' button with a right arrow icon.

Step 3: You choose your target choice, which will be Facebook.

The screenshot shows a software interface for a data migration process. At the top, a navigation bar displays six steps: 1 Source, 2 Source Config, 3 Target, 4 Target Config, 5 Mapping, and 6 Recap. Step 3, 'Target', is highlighted with a blue background and white text. Below the navigation bar, the current step, '3 TARGET CHOICE', is displayed in a large, bold, black font. In the center of the screen, there is a prominent 'facebook.' logo enclosed in a light gray rectangular box. At the bottom left, a 'Back' button with a left arrow icon is visible. At the bottom right, a green 'Next >' button with a right arrow icon is visible.

Step 4: You choose your associated ad account and which existing (or new) Custom Audience to add these contacts too.

1 Source 2 Source Config 3 Target 4 Target Config 5 Mapping 6 Recap

4 TARGET CONFIGURATION

Custom Audiences created from customers – or leads – allow you to target your advertising at the right people and achieve awesome ROI's for your ad spend. However, **what do you do if you don't have a big enough database of emails to create your own Custom Audiences?** This is where **the power of Website Custom Audiences comes in.**

This feature doesn't require you to have any data about the users you want to target. **All you have to do is wait for a user to visit your website.**

Thanks to a special tracking code – the Facebook Pixel – Facebook will recognize users and automatically add them to an Audience, making them ready to be re-targeted with advertising.

HOW TO INSTALL THE FACEBOOK PIXEL

Go to your Facebook Pixel Tab in

Create a Facebook Pixel

Add the Facebook pixel to your website to measure the impact of your ads. Unlock powerful solutions in Facebook advertising.

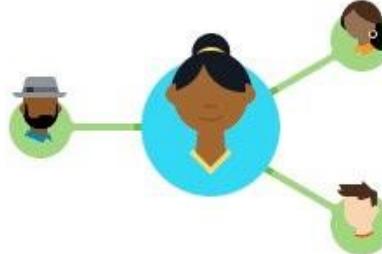

Track Website Activities

Understand the actions people take after seeing your ads. Track conversions and measure your return on advertising.

Improve Your Return on Advertising

Facebook will automatically deliver ads to people more likely to take action, based on conversion data from your website.

Reach New and Existing Customers

Show ads to people based on the actions they take on your website. Create lookalike audiences to reach people similar to your best customers.

[Create a Pixel](#)

- > Click Create a Pixel
- > Enter a name for your pixel.

Website action	Description	Standard event code
Add to Cart	Track when items are added to a shopping basket (e.g. click, landing page on Add to Cart button).	fbq('track', 'AddToCart');
Add payment info	Track when payment information is added in the checkout flow (e.g. click, landing page on billing info)	fbq('track', 'AddPaymentInfo');
Add to wishlist	Track when items are added to a wishlist (e.g. click, landing page on Add to Wishlist button).	fbq('track', 'AddToWishlist');
Complete registration	Track when a registration form is completed (e.g. subscription completion, sign-up for a service).	fbq('track', 'CompleteRegistration');
Contact	A telephone/SMS, email, chat or other type of contact between a customer and your business	fbq('track', 'Contact');
Customise product	The customisation of products through a configuration tool or other application that your business owns	fbq('track', 'CustomizeProduct');
Donate	Track donation of funds to your organisation or cause	fbq('track', 'Donate');
Find location	Track when a person finds one of your locations on the Internet or application with the intention to visit	fbq('track', 'FindLocation');
Initiate checkout	Track when people enter the checkout flow (e.g. click, landing page on checkout button).	fbq('track', 'InitiateCheckout');

- > To finish creating your pixel, click **Create** in the box that appears.
- > Your Facebook Pixel tracks multiple events depending on the page.

Lead	Track when someone expresses interest in your offering (e.g. form submission, sign-up for trial, landing on pricing page).	fbq('track', 'Lead');
Purchase	Track purchases or checkout flow completions (e.g. Landing on "Thank you" or confirmation page).	fbq('track', 'Purchase', {value: 0.00, currency: 'GBP'});
Schedule	Track the booking of an appointment to visit one of your locations	fbq('track', 'Schedule');
Search	Track searches on your website, app or other property (e.g. product searches)	fbq('track', 'Search');
Start trial	Track the start of a free trial of a product or service that you offer (e.g. trial subscription)	fbq('track', 'StartTrial', {value: '0.00', currency: 'USD', predicted_ltv: '0.00'});
Submit application	Track when a registration form is completed for a product, service or programme that you offer (e.g. credit card, educational programme or job)	fbq('track', 'SubmitApplication');
Subscribe	Track the start of a paid subscription for a product or service that you offer	fbq('track', 'Subscribe', {value: '0.00', currency: 'USD', predicted_ltv: '0.00'});
View content	Track key page views (e.g. product page, landing page, article).	fbq('track', 'ViewContent');

You'll want to add the Pixel to all pages you want to track, so ask a developer to help, or use a plugin that automatically does this for you.

For WordPress, we know ***many smart marketers use Pixel Caffeine.***

If you want to check to make sure your Facebook Pixel is working,
download the *free Google Chrome Extension, Pixel Helper*.

The screenshot shows a web-based tool titled "Facebook Pixel Helper". At the top left is a blue circular icon containing white code symbols "</>". To its right is the text "Facebook Pixel Helper" and a "Learn More" link. On the far right is a share icon. Below this header, a horizontal line separates the header from the main content area. The main content area has a light gray background and displays the message "One pixel found on adespresso.com". Another horizontal line follows. Below this line, on the left, is another blue circular icon with "</>". To its right is the text "Facebook Pixel" and "Pixel ID: 1420085114924938". To the right of this information is a "View Analytics" link. Below this section is a list of detected event types, each preceded by a small green checkmark icon and a blue arrow icon:

- ▶ ✓ PageView
- ▶ ✓ AdvancedEvents
- ▶ ⚡ Microdata Automatically Detected

And now, if you really want to unleash the power of the Facebook pixel for your business,
you can't miss this free webinar:

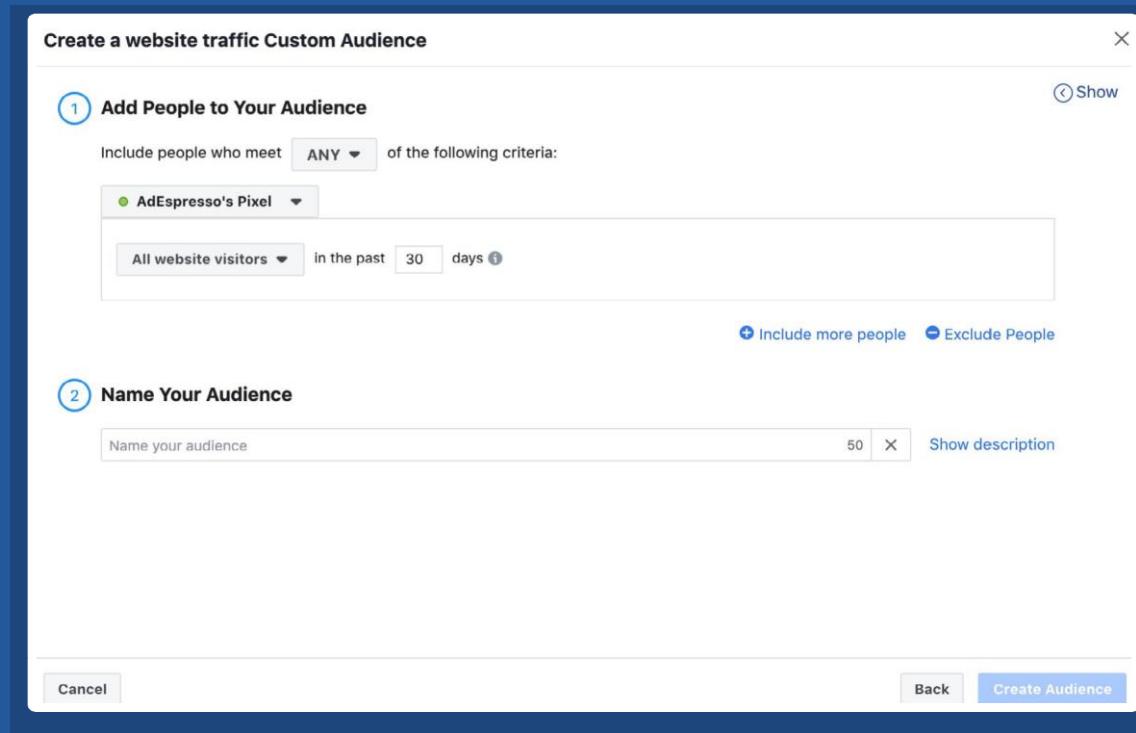

Just click on the image and you're ready to go!

CREATING YOUR FIRST WEBSITE CUSTOM AUDIENCE (WCA)

With the Facebook Pixel installed, you can now create your first website custom audience.

In Facebook Ads Manager, click on the “Audiences” button in the menu, and then click the blue “Create Audience” button.

After selecting “Custom Audience” a popup will appear, asking you what kind of audience you want to create.

1. Select “Website Traffic”
2. You can choose to add every user to your Custom Audience who has visited any page of your website or those who qualify according to specific rules. Rules are powerful and pretty easy to create. You can include or exclude people who visited a given url.

Create a website traffic Custom Audience X

1 Add People to Your Audience >Show

+ Include more people - Exclude People

Cancel Back Create Audience

For example, you could target everyone who visited your checkout page, expressing an intention to buy, but didn't see the "Thank You" page (meaning they did not complete the purchase). This gives you a "second chance" to get them to complete their purchase. Other filters include:

- > **Visitors by time spent:** select the top 5%, 10% or 25% of website visitors based on time spent on site
- > **From your events:** pick a pixel event to build an audience from. For instance use the purchase event to build a list of recent customers.
- > **Frequency:** how many times a website visitor performs an action, such as visiting a page or purchasing.
- > **Devices:** Android, iOS, desktop and all mobile devices can be included or excluded.
- > **Aggregated value:** this includes various options but is most commonly used to filter by the amount spent, for example to only include those that spent \$100 or more.

Create a website traffic Custom Audience

1 Add People to Your Audience

Include people who meet **ANY** of the following criteria:

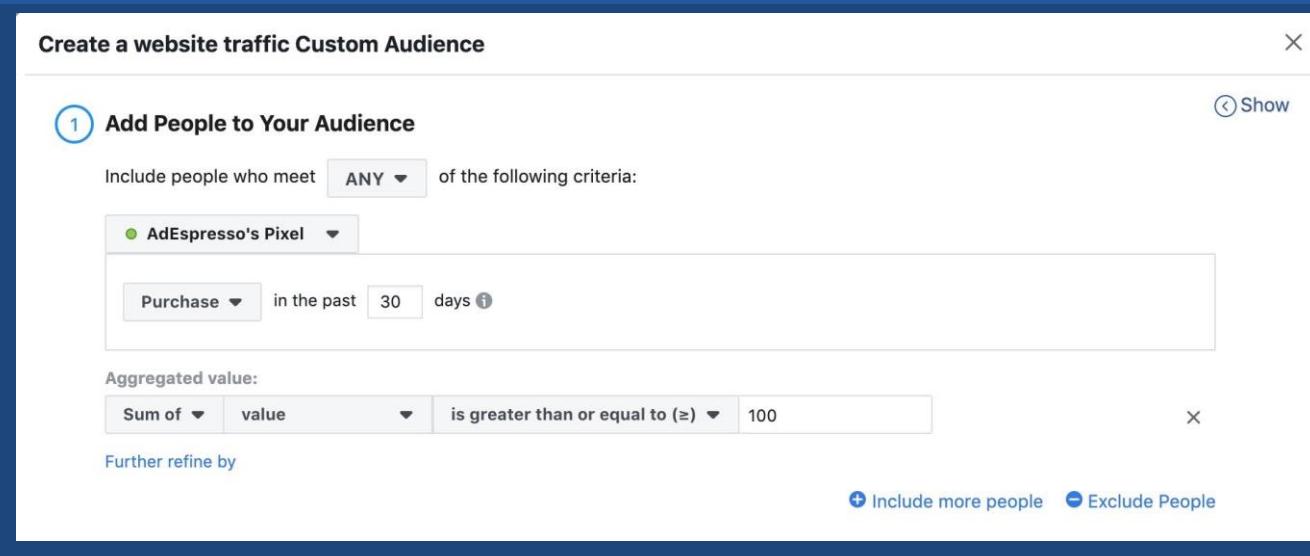

AdEspresso's Pixel

Purchase in the past 30 days

Aggregated value:
Sum of value is greater than or equal to (≥) 100

Further refine by

+ Include more people **- Exclude People**

Finally, you can select how many days to track website visitors. This means that your audience will only include people who match the specified rules during the last X days. While Facebook's suggested value is 30, the maximum value is 180 days.

Building an effective Website Custom Audience really depends on how much traffic you're getting and how strict your chosen rules are.

If your website receives a lot of traffic, you can stick with 30 days or even less. On the other hand, if your website doesn't have a lot of traffic, or you've set very strict rules, it may be wise to set this value to 180 days so you don't end up with an audience that's too small.

In either case, the sooner you reach out to potential customers through ads, the more likely they are to be effective.

Targeting Website Custom Audiences works exactly like any other audience you've created so far: start typing the name and select it when the autocomplete shows up.

It's as simple as that.

HOW TO DO IT WITH ADESPRESSO

Creating Website Custom Audiences in AdEspresso is extremely simple:

1. Go to "*Tools → Asset Manager*".
2. Click on the New Asset green button.
3. Click "Custom Audience".

Select the second option, From Website, under the Custom Audience option.

You'll then just need to give your new audience a name and description and select the filters and time range.

Et voilà!

The screenshot shows the 'Create Custom Audience' dialog box for a 'Website'. It includes fields for 'Name*' (with placeholder 'Name'), 'Description' (with a link to 'View remarketing pixel code' and a 'Copy pixel code' button), and an 'Actions' section for defining website traffic and retention. At the bottom are 'Back' and 'Create' buttons.

With mobile accounting for over 90% of Facebook ads served, it only makes sense that creating audiences based on app activity is one of the leading forms of custom audiences.

For example, you can target people who previously used your app, but have not come back to your app within the last month. Or you can target people who have added an item to their cart on your app, but never actually purchased it. Target them with a discount coupon and voila!

You can create audiences based on actions a user did or didn't take within your app!

There's a wide range of actions you can currently target, but the most popular are:

A Anyone who opened the app

A Top 5%, 10% or 25% most active users

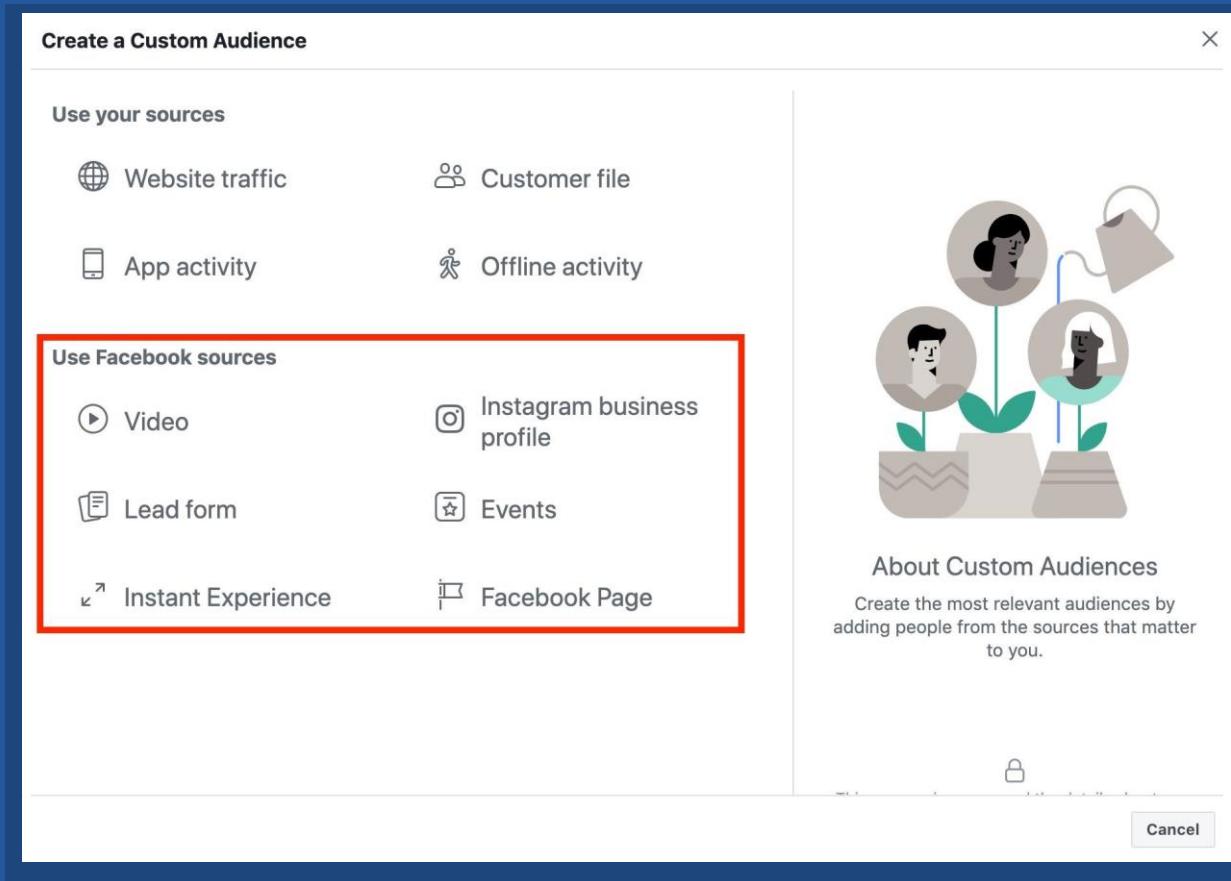

A Top 5%, 10% or 25% by purchase amount

A Users by segment, with the segment being created in Facebook Analytics

The screenshot shows the 'Create an app activity Custom Audience' dialog box. At the top, it says 'Create an app activity Custom Audience' with a close button 'X'. Below that, step 1 'Add People to Your Audience' is shown with the instruction 'Include people who meet ANY of the following criteria:'. A dropdown menu is open, showing 'Anyone who opened the app in the past 30 days' selected. Other options include 'Most active users', 'Users by purchase amount', 'Users by segment', 'From your events', 'App Launches', and 'Session End'. To the right of the dropdown, there are buttons for 'Include more people' (blue plus sign) and 'Exclude People' (red minus sign). Below the dropdown, there are buttons for 'Cancel', 'Back', and 'Create Audience'.

How do you engage your customers? Facebook offers you six different ways.

These 6 types of engagement custom audiences really open up the doors for new businesses or those that are too small to have built up email lists or large volumes of website traffic.

Let's look at each option in more detail.

1) Video Engagement Custom Audiences

Select one or more videos, the time window to include and then the percentage or time watched.

The screenshot shows a modal dialog titled "Create a video engagement Custom Audience". On the left, there are three dropdown menus: "Engagement" (set to "In the past"), "In the past" (set to "1 day"), and "Audience name" (empty). To the right is a list of engagement types, with the last item, "People who have watched at least 95% of your video", highlighted with a blue bar. At the bottom right of the modal are "Back" and "Create Audience" buttons.

X Show

This means all those likes, comments, and shares are no longer vanity metrics! Rejoice!

FACEBOOK CUSTOM AUDIENCES TYPE (QUICK REFERENCE)

Let us break it down for you:

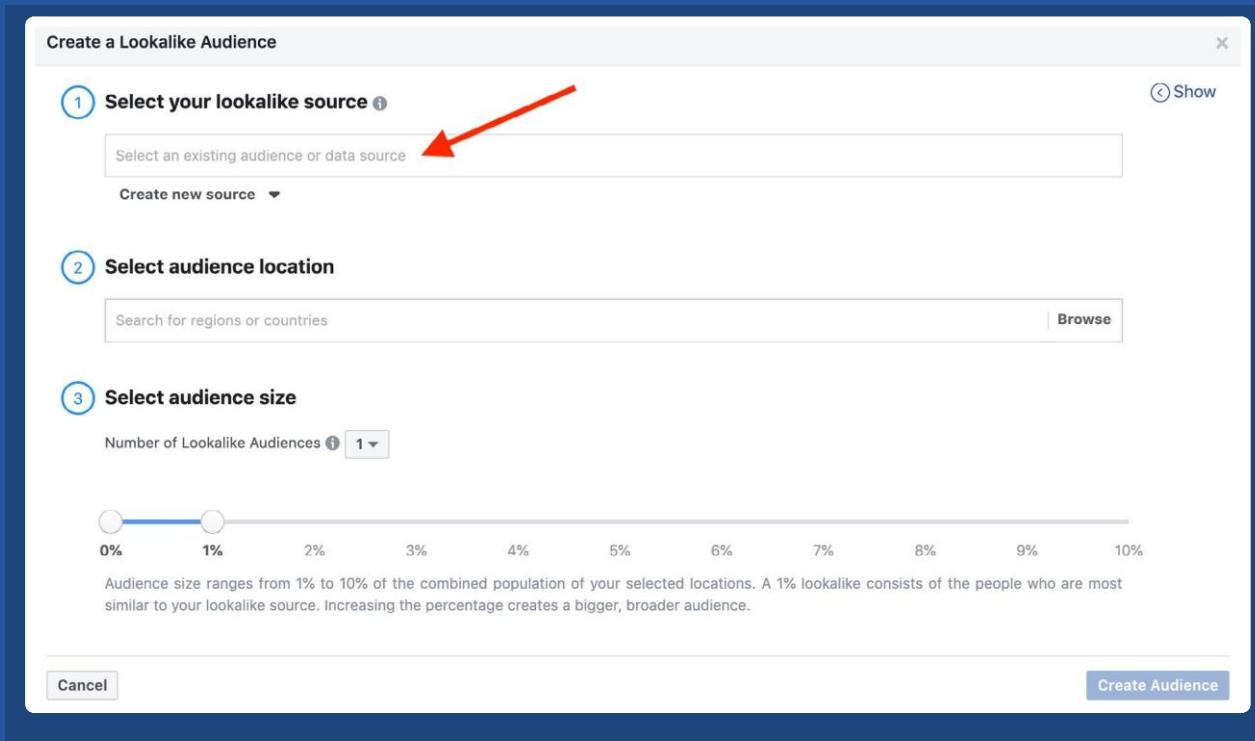

- > **Everyone who engaged with your Page:** Everyone who visited your Page or engaged with your Page's content or ads on Facebook or Messenger.
- > **Anyone who visited your Page:** Anyone who visited your Page, regardless of the actions they took. > **People who engaged with any post or ad:** Only the people who have engaged with a Page post or ad. Engagement includes reactions (Likes, Love, Haha, Wow, Sad, and Angry), shares, comments, link clicks or even carousel swipes.
- > **People who clicked any call-to-action button:** Only the people who clicked any available call-to-action button on your Page. For example: "Shop Now."
- > **People who sent a message to your Page:** Only the people who sent a message to your Page.

- > **People who saved your Page or any post:** Only the people who saved your Page or a post on your Page.

Keep in mind, the audience of page engagement has to be at least 20 people.

While custom audiences are great for re-engaging people who already had an interaction with you, **lookalike audiences allow you to target new users that don't know you yet, but are very likely to become your customers.** Choose a suitable custom audience as a source, for example current customers if the aim is to get more purchasers, or current leads if you wish to get more signups. You need at least 100 people in the seed audience to create a lookalike audience.

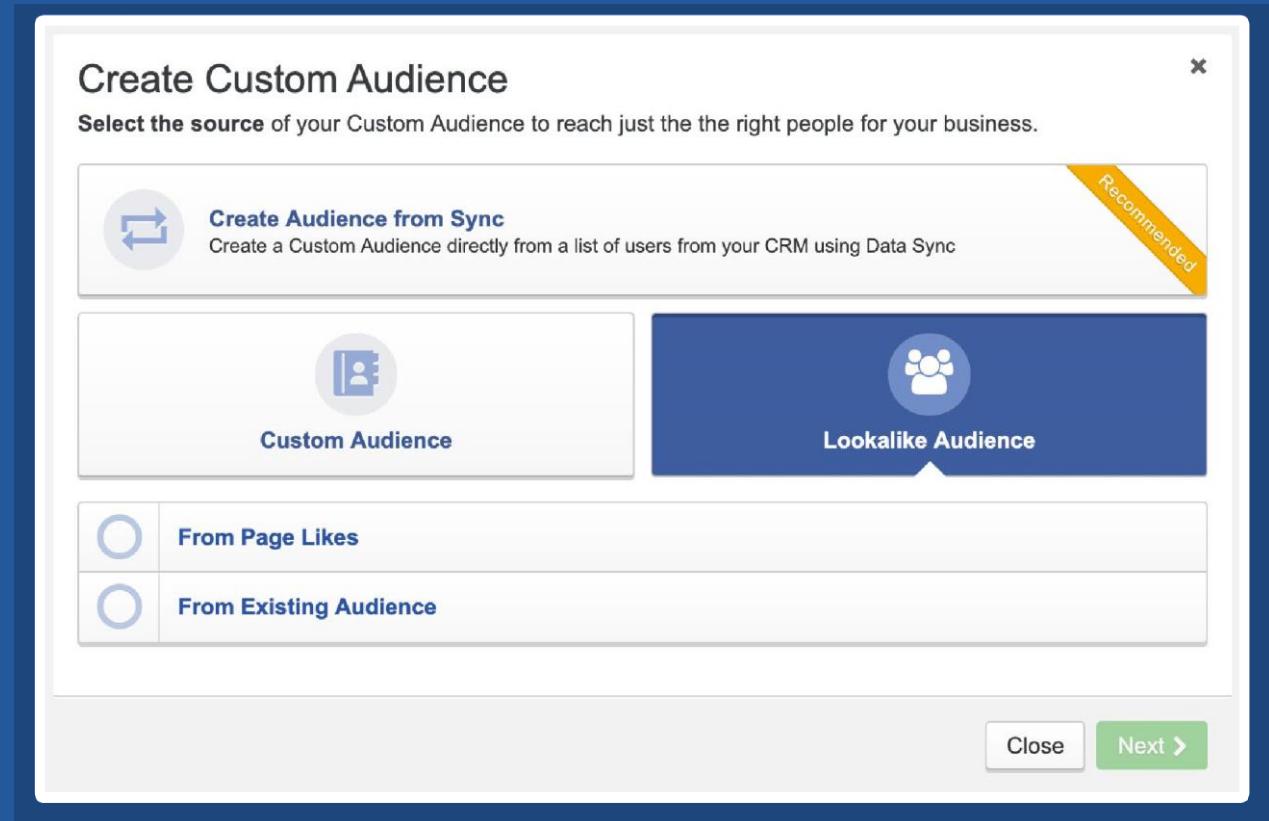

HOW TO DO IT WITH ADESPRESSO

Go to “Tools → Asset Manager”.

Click on the New Asset green button.

Click “Custom Audience”.

Select Lookalike Audience and then choose to create the Lookalike based on page likes or an existing custom audience.

Next, select the seed audience, choose a name and description and then specify one or more countries. Finally, choose the percentage of Facebook users in that country to target. The larger the percentage, the larger the audience will be but it will have a weaker affinity to the source audience.

Targeting audiences is extremely simple. Start with opening Facebook Ads Manager and creating a new adset within a campaign.

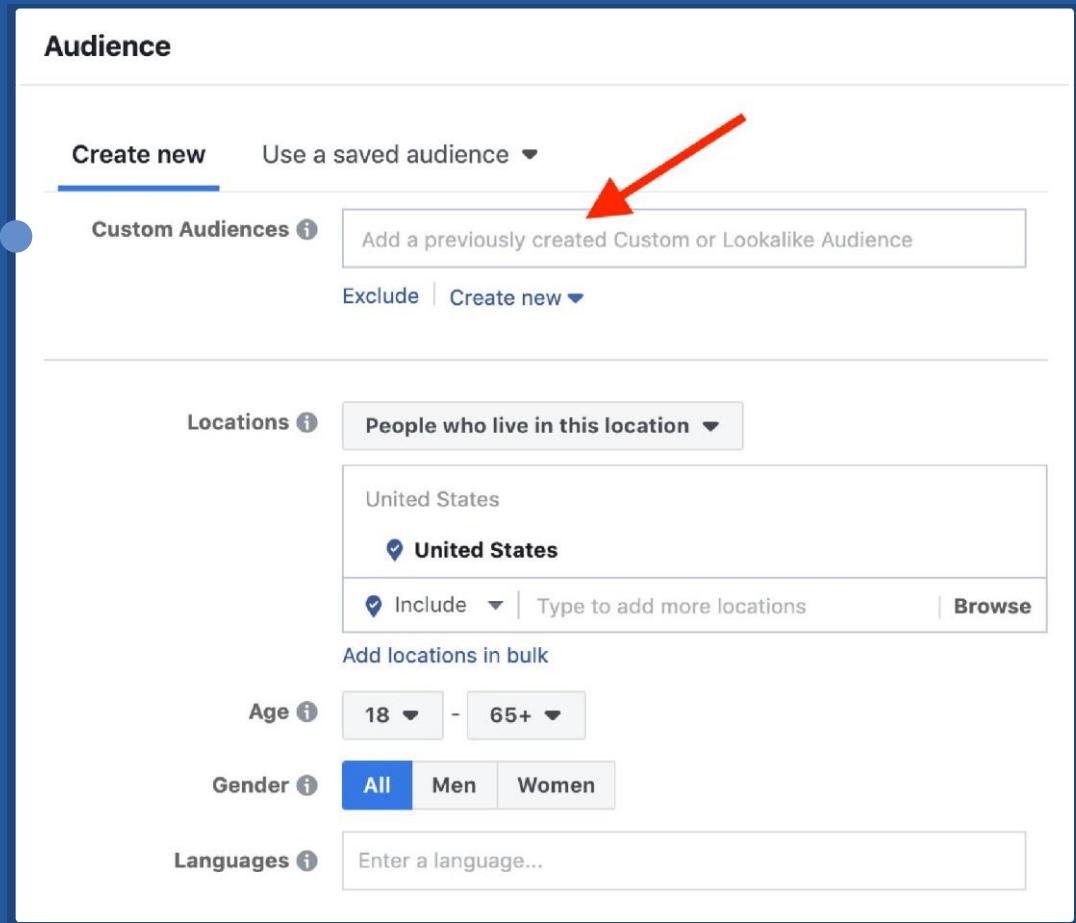

Scroll down to the Audiences section:

Just start typing the name of the Custom Audience you want to target and select it from the autocomplete list. If you want, **you can select more than one Custom Audience to increase your reach.**

Once you've selected an audience, you'll notice that hovering your mouse cursor over it will cause two icons to appear. The X deletes your audience and clicking the down arrow gives you the option to exclude the audience.

HOW TO DO IT WITH ADESPRESSO

Targeting Custom Audiences in AdEspresso is very similar to how it's done on Facebook. When defining your campaign's target at Step 3, use the Custom Audience box. You'll find two distinct options: one to select the Custom Audiences you want to target, and one for those you want to exclude.

CUSTOM AUDIENCES

Allow advertisers to target their ad to a specific set of users with whom they have already established a relationship on/off Facebook.

Include ▾

Please select a Custom Audience...

Include

Exclude

To help you get the most out of your advertising dollars, AdEspresso also allows you to perform a split test on your audiences. This way, a set of ads will be created for each Custom Audience you're targeting.

This will give you detailed statistics on the effectiveness and CPA of each one.

Now that you know how to create and use Custom Audiences, it's time to switch from theory to practice.

Custom Audiences are a powerful tool, and using them can make the difference between wasting your advertising dollars and building a money-making campaign that lasts.

To begin experimenting with Custom Audiences, here's a list of **the eight top strategies used directly by the AdEspresso team or our customers to get amazing results from Facebook Ads.**

Strategy #1: Reach users who are not reading your emails

Though it's frustrating, a lot of the people receiving your emails aren't even opening them. This doesn't necessarily mean they don't like your product or service. Most likely, your message just got buried along with hundreds of others in their inbox.

If you have something really important to announce, export (or Data Sync) your list of email subscribers who didn't open your latest emails and try to reach them through Facebook Advertising instead. Most email services allow you to segment and export lists based on who's opened your recent emails.

Strategy #2: Regain lost customers

How many times have you discovered a great site only to forget about it later? This clearly happens often, even if you've bought a great product. This may be the case for your old customers, as well.

To solve this, create a Custom Audience with a list of all the people who have bought something from you in the past, but haven't bought anything recently, and target them with ads about your new products. They already know and trust you since they've purchased from you in the past. Leverage this!

Remind them that they've done business with you in the past, and maybe **offer them a sweet deal** since they are long time customers. For these kinds of campaigns, **craft a very direct and friendly message.**

Use your brand in the picture or in the title. These users will recognize and trust your brand.

Here's a nice example from a great marketer, Andrea Vahl. She knows I already visited her blog and subscribed to her email list, so she boldly uses her name and picture in the ad to get my attention and boost my trust.

 **Andrea Vahl, Inc.**

Strategy #3: Target people very similar to your customers

This tactic is perfect to get new customers without going crazy figuring out how old are they, where they live or what interests they have. Let Facebook figure it out!

Create a Custom Audience with the emails of your customers. Then, create a Lookalike Audience from that list, starting with a small percentage at first.

Once the Lookalike Audience is ready, target these new prospects with a 60 second video of your service or product.

Strategy #4: Grow your Facebook page likes

Custom Audiences can be a cheap way to have your contacts like your page so create a Facebook Ads campaign targeted to a Custom Audience containing all your contacts.

BONUS TIP #1

If you're advertising on Facebook to generate new leads or grow your mailing list, always remember to create an updated Custom Audience with all the contacts you already have.

Then, exclude this audience from your advertising. You don't want to waste money by targeting ads at people you're already in contact with.

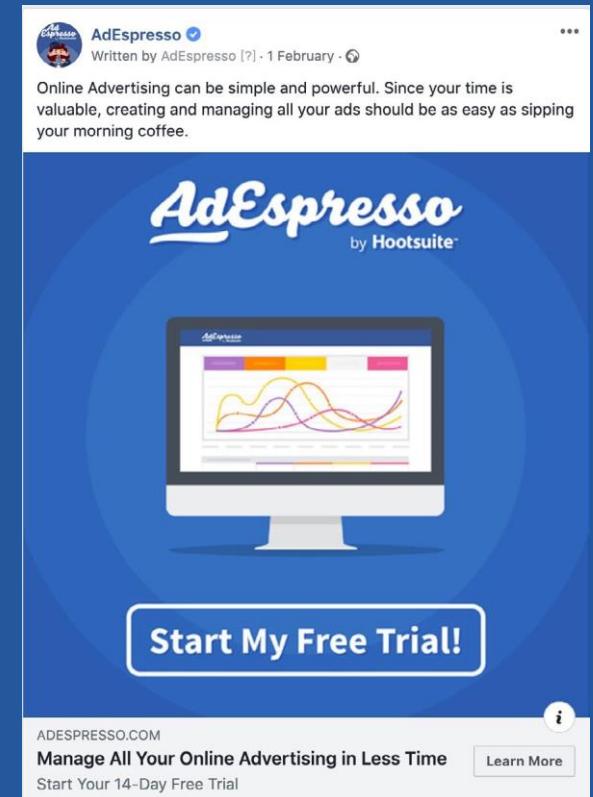

To avoid wasting money, exclude all of your existing Page fans from your targeting options. They've already liked your Page and typically won't add value.

Strategy #5: Guide People Through Your Sales Funnel

An AdEspresso subscription is only going to appeal to a subset of digital marketers and only a small fraction of the general population.

So, we boost more general blog posts to cold traffic and can then build a 5 day audience of website visitors and advertise a free trial to them. As they're already aware of AdEspresso, the conversion rate is much higher than promoting trials to cold traffic.

Current and previous customers are excluded from these campaigns using login data based on the pixel being installed on the AdEspresso login page and also custom audiences based on email lists of current and churned customers, updated using Data Sync.

Strategy #6: Upsell products or upgrades

As this guide has already mentioned, it's easier to sell to someone who has already bought from you than to a total stranger. Custom Audiences make it extremely simple to get your customer to buy more. Create Custom Audiences of people who have bought from you, segmented by product category or kind.

Strategy #7: From Web to Mobile & vice-versa

Nowadays, many businesses rely both on a website and a mobile app. Facebook Custom Audiences can be a great way to move users from one platform to the other, making sure you can reach your customers everywhere.

Simply create two audiences — one with just your website users and one with the mobile app users.

Then create two campaigns: one mobile app install campaign to have your website users install your mobile application, the other allowing your mobile users to access your website where it may be easier to close a sale.

As this guide has already mentioned, it's easier to sell to someone who has already bought from you than to a total stranger. Custom Audiences make it extremely simple to get your customer to buy more. Create Custom Audiences of people who have bought from you, segmented by product category or kind.

WARNING!

Many Facebook advertising guides about Custom Audiences note ad-hoc software that crawls Facebook's Pages and Groups, saving the Facebook User IDs of fans and group members for targeting purposes.

So, why are we not discussing it here? Because **it violates Facebook's Terms & Conditions.**

No matter how effective it is, it may get you in trouble and your account may be banned. Don't risk it!

Strategy #8: Target your Page Engagement Fans with a Lead Magnet

You know these people are liking, commenting, and sharing your page posts with their Facebook accounts...but why not get even more personal by asking for an email? This is one big advantage of the page engagement custom audience option.

By targeting your highly engaged page fans with a lead magnet (like an eBook or PDF checklist) you can open up a new channel for them: your email marketing.

Just don't forget to exclude your current customers or leads from the ads!

So, What's Next?

In this guide, we've shown you how and when to use Custom Audiences.

The next step for you is to put everything you've learned into practice – and AdEspresso has the tools to help you do just that!

If you're an AdEspresso customer —
— you'll have access to the
AdEspresso Data Sync Tool.

Instantly connect your Lead Ad Forms with HubSpot, MailChimp, GetResponse, ActiveCampaign, AWeber, and many more – new integrations are added almost every month and AdEspresso **supports multiple accounts for each tool!**

Once you've set up the sync, AdEspresso will **automatically** add all of your new leads from your Lead Ads into the CRM of your choice. The process also works in reverse – meaning you can sync your CRM contacts into a Custom Audience, too!

In addition to Data Sync, but you'll also have access to Asset Manager.

Here, you can create folders to separate the audiences, for example relating to a certain promotion or by the name of the person that created them. **This is especially useful for agencies to keep track of all their audiences across multiple ad accounts.**

The screenshot shows the AdEspresso Asset Manager interface. At the top, there's a navigation bar with links for 'YOUR CAMPAIGNS', 'NEW CAMPAIGN', 'YOUR TAGS', 'TOOLS', 'UNIVERSITY', and 'SETTINGS'. On the right side of the header, there's a user profile with '102' notifications, a 'Logout' button, and a 'Hi, Internal!' greeting. The main area is titled 'Asset Manager' and has a sub-section titled 'AUDIENCES'. A context menu is open over the 'AdEspresso' folder, showing options like 'Create new folder' and 'Create new targeting'. Below this, there's a search bar and a checkbox for 'Search in this folder'. The main table lists three audience entries:

	NAME	REACH	CREATED AT	ACTIONS
+	Content Marketing Audiences		1/17/2017	Select
+	Facebook Advertising Audiences		1/17/2017	Select
+	Instagram Audiences		1/17/2017	Select

Give it a go
